ABSTRACT

Drawing on a five-year multi-sited ethnography conducted across three Lisbon parishes, this article examines how tourism-led gentrification reconfigures the city's informal care economy. We argue that the displacement of long-term residents has cascading effects on intergenerational caregiving arrangements, disproportionately burdening migrant women employed as live-in domestic workers. The analysis integrates 87 qualitative interviews, household budget diaries, and a comparative mapping of care-related mobility patterns. We propose the concept of 'cascading displacement' to capture how housing precarity transmits into the affective and reproductive spheres, and we outline policy implications for municipal welfare regimes in southern European cities.

Keywords: *gentrification, care economy, migration, Lisbon, urban sociology*

Abstract

Drawing on a five-year multi-sited ethnography conducted across three Lisbon parishes, this article examines how tourism-led gentrification reconfigures the city's informal care economy. We argue that the displacement of long-term residents has cascading effects on intergenerational caregiving arrangements, disproportionately burdening migrant women employed as live-in domestic workers. The analysis integrates 87 qualitative interviews, household budget diaries, and a comparative mapping of care-related mobility patterns. We propose the concept of 'cascading displacement' to capture how housing precarity transmits into the affective and reproductive spheres, and we outline policy implications for municipal welfare regimes in southern European cities.

1. Introduction

This article was published by Eleventh Press International Journal of Multidisciplinary Research under a double blind peer-review model. The full text of the manuscript has been deposited alongside this record and is available via the galley links.

2. Methods

Methodological detail is preserved verbatim from the accepted manuscript. The production service has rendered this HTML, PDF, and JATS galley using Pandoc 3.1.11.1 and WeasyPrint with the journal's house CSS template.

3. Results

The findings, figures, and tables of the original submission are reproduced here. Readers should consult the PDF galley for the authoritative typeset version.

4. Discussion

We argue that the displacement of long-term residents has cascading effects on intergenerational caregiving arrangements, disproportionately burdening migrant women employed as live-in domestic workers
